

*EZ-Lift Option for BKI Fryers*

# SAFE. EFFICIENT. EASY.

## ***BKI® Introduces The EZ-Lift For BKI Fryers***

If you are looking for a pressure fryer, but want the safety of an auto-lift feature, you are going to love the optional EZ-Lift for all BKI fryers.

The EZ-Lift makes loading and unloading our fryers a safe and easy procedure. Once the basket is lifted from the vat, it can be easily swung to our special LTS landing table for the ultimate frying station. The EZ-Lift can be mounted to the left or right side.

You can purchase the complete system on a new fryer or can be retrofitted to most large capacity BKI pressure and auto-lift fryers. Enjoy the ease and safety of an EZ-Lift with the power of pressure frying.
